

Attempting to participate in the PGY2 match without having completed a PGY1 or Attending a non ACPE- Accredited School

PGY1 Pharmacy Residency Exemption Process

If you have not completed an ASHP-accredited postgraduate year one (PGY1) pharmacy residency and want to be considered to be eligible for a PGY2 pharmacy residency position ASHP must clear you with the National Matching Service (NMS) to state you meet the PGY1 residency exemption process.

To be considered for exemption from a PGY1 pharmacy residency you must:

- Be licensed to practice as a pharmacist in the US when applying to PGY2 programs in the U.S.
- Have practiced at least THREE years as a PHARMACIST (the equivalent of full-time employment) or must have completed a pharmacy training program they believe to be equivalent to an ASHP accredited training program in the U.S.)

If this is the case, the following should be uploaded to the PhORCAS portal in the upload provided:

If you participate in the PhORCAS system:

- File upload must be – “PGY1 exemption request materials”
- Include your name, email and phone number
- Attach: A written document that addresses how your experience meets the following required outcomes and each goal per outcome (required of all individuals that complete a PGY1 pharmacy residency). Please describe the activities, projects, services provided or information that shows you

meet the following goals under each of the required 6 outcomes. Feel free to attach additional documents to verify you have met these outcomes (e.g. formulary reviews, presentations, etc.).

ASHP will contact both you and the National Matching Service, by email, to notify you if you can be considered for PGY2 interviews and participating in the PGY2 Residency Matching Program, once the review process is complete.

ASHP PGY1 Pharmacy Residency Required Educational Outcomes and Goals

For more detailed information about outcomes, goals, objectives and instructional objectives see:

<http://www.ashp.org/DocLibrary/Accreditation/PGY1-Goals-Objectives.aspx>

Outcome R1: Manage and improve the medication-use process.

Goal R1.1: Identify opportunities for improvement of the organization's medication-use system.

Goal R1.2: Design and implement quality improvement changes to the organization's medication-use system.

Goal R1.3: Prepare and dispense medications following existing standards of practice and the organization's policies and procedures.

Goal R1.4: Demonstrate ownership of and responsibility for the welfare of the patient by performing all necessary aspects of the medication-use system.

Outcome R2: Provide evidence-based, patient-centered medication therapy management with interdisciplinary teams.

(When provided as part of the practice of direct patient care, this outcome

always involves a series of integrated, interrelated steps.)

Establish collaborative professional relationships with health care team members

Place priority on delivery of patient-centered care to patient

Establish collaborative professional pharmacist-patient relationship

Collect and analyze patient information

When necessary make and follow up on patient referrals
